ABSTRACT

A study examined the activity of the state technical committees that were mandated by the Carl D. Perkins Vocational Education Act. The study's main objectives were to identify (1) the methods that individual state technical committees used to develop and verify task lists and/or skill inventories; (2) the different reasons for selecting the job area/occupation chosen; and (3) the ways in which states are implementing the task lists in their curricula. Thirty-six states, the District of Columbia, and Puerto Rico responded to the survey. The most common method of developing a task list was to compile a basic list from more than one existing list and then to verify it by a panel or committee of representatives from that job area. Few states had the same reason for selecting the job area/occupation analyzed. Reasons cited included needs assessments; economic outlook; societal problems and needs; input from business/labor, state staff, educators, enrollees; and business/labor analyses. The lists are being used for such purposes as modifying curricula, defining model curricula, developing guides, providing teacher inservice training, and selecting and developing new curriculum materials. (This document presents state-by-state responses to the survey questions in chart form, and includes a copy of the survey form.) (MN)

Foreword

Since the passage of the Carl D. Perkins
Vocational Education Act of 1984 with its State
Technical Committee mandate, the East Central
Region of the National Network for Curriculum
Coordination in Vocational and Technical Education
(NNCCVTE) has been keenly interested in its effect
on vocational education curriculum.

This is the third in a series of publications on the State Technical Committees. The first two, Technical Committees: From Concept to Action and State Technical Committees: State of the Art, were produced in cooperation with the National Alliance of Business (NAB).

This publication reports on the results of a national survey conducted during 1988. It focuses on the task lists developed by the state technical committees and includes such information as stage of development, process, components, and committee makeup or representation.

Sincere appreciation is expressed to East Central Network staff contributing to the publication, Marianne Lawrence, Editorial Writer, and Dr. Ruth Patton, Assistant to the Director. More information on technical committees and specific task lists may be obtained by contacting the East Central Network, !!linois Vocational Curriculum Center, Sangamon State University, F-2, Springfield, IL 62794-9243, 217/786-6163.

Rebecca S. Douglass Director

Activity Report

State Technical Committee Activity focuses on the task listings that have been produced as a result of state technical committee activity. These committees were organized in each state to comply with the Carl D. Perkins Vocational Education Act. The technical committee mandate combined education with business and industry in the development of curriculum.

The 1988 survey (see Appendix) was sent to vocational educators in 50 states, the District of Columbia, Guam, American Samoa, Northern Marianas, Puerto Rico, Trust Territory and the Virgin Islands. Responses in this report include 36 states, the District of Columbia and Puerto Rico.

The three main objectives of the survey are detailed as follows.

Identify methods states used to develop and verify task lists or inventory of skills.

Rarely did a state use one method for task list development/verification. The most common process used by the majority of states, was to compile a basic list from more than one existing list,

such as V-TECS, MAVCC or IDECC or a statedeveloped task list. The list was then verified by a panel or committee of representatives from the job area. A few states did a mail survey to verify the lists or used a combination of panel and mail survey.

Other methods used include 1) use of an existing task list (usually one developed by the state) and verifying it by a panel of job representatives or through a mail survey; 2) use of the DACUM (Developing A Curriculum) method and in some cases verifying the task list by mail survey or with input from vocational educators; 3) developing a task list by reviewing curriculum guides, receiving input from the vocational community and conducting a mail survey, then verifying the list by a panel of job representatives; or 4) conducting a mail survey and receiving input from vocational educators and advisory committees.

Identify reasons for the selection of the job area/occupation.

Few states had the same reason for selecting the job area/occupation for task development and verification. Frequently the job occupation area was selected based on a decision by a committee (state technical, advisory, program improvement or curriculum management). Most states used a

combination of data to select the job/occupation area. The following are data combinations used:

- business/labor, state staff, educators, administrators, enrollees
- business/labor analysis, technological change, curriculum need, enrollment trends
- assessments, needs, economic outlook, state council, state staff
- societal problems/needs, job availability, needs assessment
- state staff, state council, technical committee.

Examples of singular sources for data used by some states to select the job/occupation area include:

- enrollment
- business licenses
- need for updated curriculum
- state choice
- advisory committee
- lack of state uniform task lists.

Identify ways states are implementing the task lists in the curricula.

States are integrating or developing curriculum based on the task lists. In some states, task lists are used as required curriculum elements, as state

standards, state frameworks or to standardize statedeveloped curriculum materials. Other ways states are using the task lists include:

- modifying curriculum to reflect the technical committee report
- defining state-of-the-art model curricula
- selecting and developing new curriculum material
- providing task lists to teachers
- providing in-service workshops
- developing guides
- integrating task lists in the introduction of the suggested curriculum model
- becoming a part of the state-of-the-art system that uses a computerized curriculum generator to identify [agriculture] competencies to be taught.

Conclusion

The interpretation of the state technical committee legislative mandate varies from state to state. Survey findings reveal that nearly all states used members of the business and industry community to formulate the task lists and form the technical committees. It would then seem that the mandate's goal has been accomplished. The activity has also resulted in renewed interest in producing quality vocational education curriculum.

State Summaries

The following pages contain a summary of each state's technical committee activity. This includes two charts. One lists the name of the job area task list, its stage of development and its product components. The second chart identifies the composition of each committee, i.e., incumbent workers, supervisors, educators, etc., and the number representing each category. The chart also indicates if the committee members were involved with development (D) or verification (V).

Connecticut and New York's response to the survey revealed a unique approach to technical committee activity as set forth by the legislative mandate. Since task list information required by the survey was not received, these states are not represented in this report.

Clearinghouse

The East Central Network/Illinois Vocational Curriculum Center has become a clearinghouse for

the State Technical Committee Task Lists. This designation has the approval of the Directors' Council of the National Network for Curriculum Coordination in Vocational and Technical Education (NNCCVTE).

Not all of the task lists reported on in this survey are available from the Center. Those which are marked (+) in the charts may be requested by contacting the Center.

Reason Committee members decision.

<u>Implementation</u> Information not available.

Method
Task list will be developed from a mail survey, study of V-TECS, state, MAVCC and ODAS task lists, business/industry materials; and existing state courses of study. The verification will be by a panel and by individual worker interviews.

| Task Listing Title | Stage of Development | | | Product Components | | | | | | | | |

| Non-Renewable Natural Resources: Tourism, Small Engine, Marine Mechanic | V20-30 | V10 -20 | | | | | | | | | | |

<u>Reason</u> Selection was based on business licenses including a cross section of size and location.

<u>Implementation</u>
The task lists are integrated into the state's model curriculum.

<u>Method</u> Using another state's task list, a mail survey was conducted to verify the task list.

17

Organization
Alaska designates three technical committees each year for model curriculum development. Each committee has approximately 30 members.

| Task Listing Title | Stage | Stage of Development | | | Product Components | | | | | | | |

| Cashier/Checker Training-Program | V 4 | | V 5 | V 2 | | | | | | | | | |

Reason

Recognized the need for updated curriculum, including the lastest technology in the field.

Implementation

Curriculum is developed around the task list.

Method

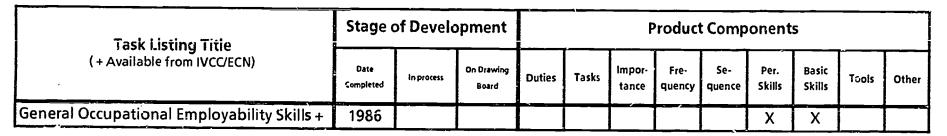

Automotive Technician --The National Automotive Technical Education Foundation (NATEF) task list was verified by field technicians by a process similar to DACUM. The development committee was representatives from all auto industry and educators and the task listing was verified by technicians in the field.

Building Trades --The task list by the association of General Contractors (AGC) will be verified by instructors and general contractors throughout the nation. Development was done by Oklahoma and V-TECS research and the list was verified by instructors and general contractors throughout the U.S.

Cashier/Checker Training Program -- The V-TECS and MAVCC task lists will be verified.

| Task ListingTitle | | Committee Representation and Process D = Development V = Verification | | | | | | | | | | |
|---|---------|---|-----------|-----------|--------------------|------|---------------------------------------|--|--|--|--|--|
| | Workers | Supervisors | Educators | St. Staff | Organiza- tions | COVE | Other | | | | | |
| General Occupational Employability Skills | | V 10 | V 2 | | | | · · · · · · · · · · · · · · · · · · · | | | | | |

Reason

Selection was made by the State Director of Career-Vocational Preparation.

<u>Implementation</u>

The task list is infused into the State Department of Education Model Curriculum Standards and frameworks for each vocational education instructional area.

Method

A state-developed and business/industry task list formed the basic task list that was developed by the DACUM process and verified by the Structured Group Interview technique.

^{*} The Marketing Education area includes Apparel & Accessories, Business & Personal Services, Entrepreneurship, Financial Services, Food Marketing, General Marketing, Hospitality & Recreation, Transportation & Travel, and Vehicles & Petroleum. The information is based on outlined procedures.

Reason

The occupation/job area was selected as a result of lack of a state uniform task list in the area of instruction and because of the significant number of programs statewide. The following areas are exceptions:

Child Care Occupations -- schools were surveyed to identify occupations for which students are trained.

Marketing Education -- the area was selected according to CIP classifications, demands in occupations for the state according to labor market statistics, and survey of the keting programs.

The State Technical committee selected the following areas: Accounting, Clerical, Computer Operator, Business Computer Programmer, Management Trainee, Microcomputer Specialist, Secretarial.

<u>Implementation</u>

The task lists were designed to be implemented as an integral part of the curriculum. Exceptions include:

Agriculture (Production and Off Farm) -- a state-of-the-art system that uses a computerized curriculum generator to identify competencies to be taught in a program based on student occupational objectives is used to implement task lists into the curriculum.

Marketing Education -- the task list is used as part of the introduction to the suggested curriculum model for Marketing Education. For the business courses, the task lists referred to as job entry competencies are minimal requirements.

Method

The majority of task lists were developed by the use of a mail survey to incumbent workers, supervisors/administrators, educators, and state staff and then verified by incumbent workers and educators.

The following areas are exceptions:

31

Agriculture -- a mail survey results, interviews with incumbent workers and the National Agriculture Occupations Competency Study were used to generate a basic task list. That task list was further developed and then verified by a committee composed of incumbent workers, supervisors/administrators, educators, and state staff and use of the Structure Group Interview method.

Marketing Education -- plans include use of the Structured Group Interview method to verify a basic task list compiled from IDECC and information from incumbent workers, supervisors/administrators, and educators.

Business -- business occupational areas were developed using the DACUM method then verified by incumbent workers and educators.

| Electrical Trades | V 11 | | | | | | | | | | | | | | |

Reason

Labor market demands determined selection of the areas of Business Education with emphasis on banking and financial occupations and Electrical Trades.

Implementation

Task lists become a part of the revised Delaware State Standards for Office Occupations. Teachers incorporate the electrical trades task lists in existing curriculum.

Method

Task lists from Florida, IDECC and West Virginia were compiled and verified for Business Education by the Structured Group Interview (SGI) technique which uses a panel of incumbent workers. The Electrical Trades task list was verified through the use of mail survey and SGI.

Reason
The Vocational Education Coordinating Advisory Committee and State Board for Vocational Education selected the occupational

Implementation Curriculum guides are developed from the inventory of skills or task lists.

Method
The task listings were developed by reviewing curriculum guides, from technical committee members' input, and by mail survey.

| Machine Shop/Precision Machinery | V 4 | V 1 | | V 1 | | | | | | | | | | |

Reason for Selection The selection was the state choice.

Implementation Curricula are modified to reflect the technical committee report.

Method

Existing task lists including state-developed, Alabama and Oklahoma were used to form a basic task list used by the technical committee. An incumbent worker panel verified the list.

The occupational areas were chosen based on assessments, needs, economic outlook, and input from COVE and DAVTE state staff.

Implementation
The duties and tasks form the basis of instructional content for secondary, postsecondary and adult occupational training programs.

Method
Using an intensive structured group interview (SGI) process for verifying tasks, the technical committees developed the definitions, duties and tasks.

Organization

The state of Indiana has a Technical Committee for Curriculum Development and Review (Standing Technical Committee) and the following ad hoc technical committees: Technology Forecasting Task Force; Vocational Agriculture, Foundation Proficiencies/Basic Competencies; Consumer and Homemaking.

The objectives of the Standing Technical Committee are 1) examine the current labor market supply and demand for determining occupational areas in need of curriculum development or improvement, and 2) coordinate the development of an inventory of skills from available resources for use in defining state of the art model curricula. The goal of the Standing Technical Committee and all the ad hoc technical committees is a stronger curriculum for vocational-technical education programs for use at the secondary, postsecondary and adult levels which address labor market and individual student needs.

Note: The Indiana Commission on Vocational & Technical Education Report is available from the IVCC/ECN.

<u>Committee Representation and Process</u>
The technical committees are composed of five business/industry representatives and one educator. Incumbent workers make up the population for the mail survey.

Selection based on the heaviest enrollment in courses and programs.

Implementation

Kansas provides inservice sessions during the state vocational conferences to assist teachers in implementing the task lists (occupational profiles) in the curriculum.

Method

Other states were surveyed and their task lists were used or compiled into one (depending on time). The technical committee used the task lists to modify, according to Kansas needs, into an entry level provile. The profile (task list) was verified by a survey sent to incumbent workers.

Reason
The decision was made to revise all of the Kentucky vocational education task lists.

Implementation In Kentucky task lists serve as foundations for the development of competency based vocational education curriculum.

 $\underline{\text{Method}}$ Both J-TECS and Kentucky task lists were verified by a mail survey and panel of incumbent workers.

Committee Representation Information is not available.

| Ward Clerk | | 2 | 1 | 1 | | | 1 | | | | | | |
| Welding | 1 | 2 | 1 | 1 | | | 2 | | | | | | |

Reason

The occupational/job areas were selected based on input from business/industry, classroom instructors, vocational directors and state staff.

<u>Implementation</u>

The Louisiana curriculum project consists of three phases. The first phase was the adoption of competency based postsecondary curriculum outlines for use in all of the postsecondary vocational-technical schools in the state. Phase II involved the development of instructor's guides for each curriculum and Phase III will be to develop the secondary curriculum guides from the postsecondary guides which will insure articulation between the two programs.

<u>Method</u>

Louisiana's task lists and lists from other states, business/industry, V-TECS and MAVCC were compiled and verified using the SGI technique, mail survey, and interviews with incumbent workers.

| Legal Secretary (DACUM) | D 10 | - | | | | | |
| Residential Carpenter | V 10 | V 4 | | | | | |
| Residential Electrician (DACUM) | D 8 | | | | | _ | |

Reason

The Technical Committee for each occupation, with input from the state staff and Council on Vocational Education, selected the job area.

Implementation

The task list becomes part of a curriculum package containing the task analysis, a competency profile developed from the task list by teachers, state standards and specifications for the program area, an annotated bibliography, resource list, and employability profile.

Method

Maryland uses two methods. The DACUM method was used to develop task lists in the areas of Building Maintenance Worker, Business Data Processing, Executive Secretary-Word Processing Skills, Legal Secretary and Residential Electrician. The Task Analysis Process (TAP), a method adapted from the Structured Group Interview (SGI) was used to verify the V-TECS task lists in the areas of Bricklayer/Trowel Trades, and Peating and Air Conditioning Mechanic, and the V-TECS and Illinois task lists in the areas of Building Maintenance Worker and Residential Carpenter.

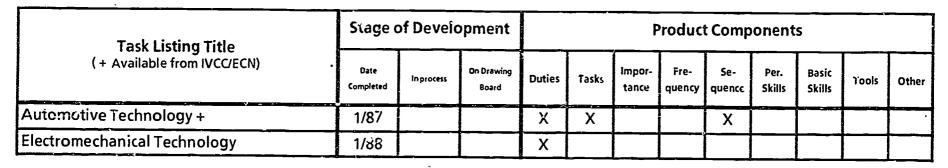

Organization
One of the missions of the Technical Comm.ttee in Maryland is to establish Occupational Content Committees for each occupational cluriter. The committee consists of 8 - 12 people who are workers in the occupation or are direct supervisors. The Content Committee defines/verifies tasks, recommends type and level of knowledge and skills needed, and develops an equipment list.

| Task Listing Title | | Committee Representation and Process D = Development V = Verification | | | | | | | | | | | |
|------------------------------|-------------|---|------------|-----------|--------------------|------|-------|--|--|--|--|--|--|
| | Workers | Supervisors | Educators | St. Staff | Organiza- tions | COVE | Other | | | | | | |
| Automotive Technology | D 9 V 18 | D 5 V 6 | D 4 V 7 | V 2 | | | | | | | | | |
| Electromechanical Technology | D 8 V 8 | D 8 V 8 | D 3 | | | | | | | | | | |

Reason

The Automotive Technology area was selected as a result of a survey of education, labor, business and state government. The Electromechanical Technology selection was made because the State Council wanted to address fiber optics and lasers.

<u>Implementation</u>

The Automotive Technology task list is mailed to the vo-tech teachers. If the task lists are not implemented in a related curriculum the teachers must defend their decision. A team of teachers has been funded to develop a curriculum for the new area of Electromechanical Technology.

Method

The Automotive Technology task listing was developed through committee meetings with vo-tech teachers and by interviews with incumbent workers. The list was then verified by the SGI method. The Electromechanical Technology task list was developed and verified by committee meetings and a mail survey.

Cognitive and affective skills

Committee Representation

Eight to 12 incumbent workers in the occupation serve on each committee.

Reason for Selection

The state staff prioritized the occupation/job area based on length of time from last update of materials, supply and demand of workers/jobs, enrollment data, etc.

Implementation

Task lists are provided that list the essential skills to be included within the curriculum and program.

Method

State-developed, Illinois, V-TECS, IDECC and MODAS task lists were used to develop an initial base list for use by the technical committees. The Structured Group Interview method was used to verify the task lists with the exception of agriculture and business education. The mail survey method was used to verify agriculture task lists and individual interviews with incumbent workers verified the business education lists.

^{*} Information not available

Reason

Selection based on needs assessments and employment data.

Implementation

Task lists are used to standardize curriculum for state-developed curriculum materials and test item banks.

Method

A panel developed the task lists from V-TECS, IDECC, and ODAS task lists. The lists were verified by a mail survey and panel.

Organization

The state of Mississippi has two technical committees. one for vocational programs and one for technical programs. Each technical committee appoints subcommittees. The goal is to standardize curriculum.

| Welding | | 7 | 5 | 3 | | | Bus./Ind., OK V-TECS | | | | | | |

Reason

Each occupational area was selected based on a priority determination from state program directors, teachers, and number of enrollees, and review of completeness and accuracy of current listings and/or curriculum.

<u>Implementation</u>

Each task list is utilized to develop instructional analysis, written/mediated curriculum materials, criterion referenced tests, tools/equipment lists, resource references, and statewide computerized student mastery record keeping.

Method

The basic procedures Missouri used was to combine existing task list into a single listing using the DACUM method, then verifying the task lists throughout the state by mail survey. The sources for existing task lists are identified in the Committee Representation Chart. Otherwise, the task list was developed from scratch.

| Task Listing Title | Stage | Stage of Development | | | Product Components | | | | | | | | | |

| Retail Salesperson | D8 | | D2 | D 1 | | - | | | | | | |
| Telemarketing | D 3 | | D2 | D 1 | . D 1 | | | | | | | |

Reason
The selection is based on labor market information and input from representatives of various vocational programs.

Implementation In the planning stage.

Method
Nebraska has a statewide technical committee advisory group that provides guidance regarding technical committee activity. The task lists are developed using the DACUM method.

| Task Listing Title | Stage o | Stage of Development | | | Product Components | | | | | | | | | |
|---------------------------------|-------------------|----------------------|---------------------|--------|--------------------|-----------------|----------------|---------------|----------------|-----------------|-----------|--|--|--|
| (+ Available from IVCC/ECN) | Date Completed | In process | On Drawing Board | Duîies | Tasks | Impor- tance | Fre- quency | Se- quence | Per. Skills | Basic Skills | Tools | Other | | |
| Business and Office Occupations | | | Х | | | | | | | | - | | | |

| Horticulture | | Х | | Х | | | | | Х | | Х | | | |

| Task Listing Title | | Committee Representation and Process D = Development V = Verification | | | | | | | | | | |
|-------------------------|---------|---|-----------|-----------|--------------------|------|---------|--|--|--|--|--|
| rask disting frice | Workers | Supervisors | Educators | St. Staff | Organiza- tions | COVE | Other | | | | | |
| Child Care Aide | 1 | | | 2 | | | | | | | | |
| Health Occupations Core | Plan to | 4 | | 1 | | | 1 | | | | | |
| Horticulture | 3 | 1 | Х | 1 | | | Invited | | | | | |

Reason

Selection of the Health Occupations Core was made by committee decision and the State Council selected Child Care Aide. Perceived changes in the necessary skills for employment determined the selection of Business and Office Occupations.

<u>Implementation</u>

The Horticulture task list represents areas of importance and achievement in the curriculum.

Method

Several task lists were located, then verified by a committee using the SGI method to develop the Horticulture list. Task lists for Child Care Aide are being reviewed and Ohio and Illinois task lists for Health Occupations Core have been identified for review.

| Task Listing Title | Stage of Development | | | Product Components* | | | | | | | | |
|--|----------------------|------------|---------------------|---------------------|-------|-----------------|----------------|---------------|----------------|-----------------|-------|-------|
| (+ Available from IVCC/ECN) | Date Completed | In process | On Drawing Board | Duties | Tasks | Impor- tance | Fre- quency | Se- quence | Per. Skills | Basic Skills | Tools | Other |
| Food Production Management & Service (Fast Foods) | | | Х | | | | | | | | | |
| Industrial Machinery Maintenance and Repair | | | Х | | | | | | | | | |

^{*} No information available

Reason
The need was identified through state labor market analysis, technological changes curricula need and enrollment trends.

<u>Implementation</u> No information available

Method

Existing task lists from the District of Columbia, Florida and South Carolina (supplied by the East Central Curriculum Coordination Center) will form the basis for the verification using methods by the Department of Labor.

Committee Representation

Members on the committee will represent workers, supervisors, state staff and the department of labor.

| Task Listing Title | Stage (| Stage of Development | | | Product Components | | | | | | | | | |
|------------------------------------|-------------------|----------------------|---------------------|--------|--------------------|-----------------|----------------|---------------|----------------|-----------------|-------|-------|--|--|
| (+ Available from IVCC/ECN) | Date Completed | în process | On Drawing Board | Duties | Tasks | Impor- tance | Fre- quency | Se- quence | Per. Skills | Basic Skills | Tools | Other | | |
| Child Care | 5/86 | | | Х | X | X | | X, | Х | Х | | | | |
| Hospitality Education/Food Service | 5/86 | | | Х | Х | Х | | Х | X | Х | | | | |
| Office Technology II | 12/85 | | | Х | Х | | Х | Х | Х | | | | | |

| Task Listing Title | | Committee Representation and Process D = Development V = Verification | | | | | | | | | | | | |
|------------------------------------|---------|---|---|-----------|--------------------|--------------------|-------|--|--|--|--|--|--|--|
| Tusk Listing Title | Workers | Supervisors | Educators | St. Staff | Organiza- tions | COVE | Cther | | | | | | | |
| Child Care | D 3 | D2 V1 | V 22 | D 1 | | Sec. 16 1. 51.51.5 | | | | | | | | |
| Hospitality Education/Food Service | D 2 | D 2 V 1 | V 15 | D 1 | | | | | | | | | | |
| Office Technology II | V 2 | V 4 | • | V 1 | | | | | | | | | | |

Reason

Child care was selected because coop programs focus on child care due to high teen pregnancy rate in the state, abuse statistics, local needs assessment, and job placement data. Hospitality Education/Food Service was chosen because Jobs are available in this area and the need assessment from communities/schools defined it as an area of need. Office Technology II was selected by the Technical Committee as the capstone course that prepares the student to make the transition from classroom to workplace.

<u>Implementation</u>

Integrated with lesson plans and new curricula.

Method

Existing task lists (Child Care from Colorado, Oklahoma, New Mexico, Hospitality Education/Food Service from Colorado, Oklahoma and New Mexico; and Office Technology II from Oklahoma and Texas) were compiled. Separate committees developed a task list from the compilation then verified it.

| Task Listing Title | Stage o | Stage of Development | | | Product Components | | | | | | | | |
|------------------------------|-------------------|----------------------|---------------------|--------|--------------------|-----------------|----------------|---------------|----------------|-----------------|-------|-------|--|
| (+ Available from IVCC/ECN) | Date Completed | in process | On Drawing Board | Duties | Tasks | Impor- tance | Fre- quency | Se- quonce | Per. Skills | Basic Skills | Tools | Other | |
| Data Processing | | χ. | | Х | | | | Х | Х | | - | | |
| Masonry | | Х | | Х | | | | Х | Х | | | | |

Reason The need to update curriculum.

<u>Implementation</u>
Curriculum, including competencies, objectives, tests and learning objectives, will be based on task lists.

 $\frac{\text{Method}}{\text{DACUM}} \ \text{method will be used to develop the task lists then teachers will do the verification}.$

<u>Committee Representation</u> <u>Information not available.</u>

North Dakota, Continued

Reason

The selection of the occupation/job area for the task is by vote of the Curriculum Project Management Team.

<u>Implementation</u>

The task list is implemented in the curriculum by a curriculum project that inservices teachers with a follow-up by state board supervisors.

Method

Task lists from MAVCC, IDECC, AIT, and CORD are assembled and collapsed into one list which is verified by a panel of incumbent workers and supervisors. North Dakota refers to the method as Modified Delphi.

| Task Listing Title | Stage | Stage of Development | | | Product Components | | | | | | | | |

Committee Representation

Committees that developed the Carpentry, Dental Assisting, Electronics, Masonry, Electrician and Small Engine Repair Task Lists were composed of employees and supervisors in the occupational area and apprenticeship trainees. Each committee has from five to nine members.

<u>Reason</u>

The choice for Clerk Stenography, Word Processing, Data Processing, Accounting/Computing and General Merchandising was based on employment projections in the occupations with high growth areas receiving priority. The other Task Listing selections were based on student enrollment and/or the scheduled five year revision of the task activity/analysis.

<u>Implementation</u>

The task lists are used by teachers as a basis for developing program curriculum guides (courses of study) to meet college requirements for standard certification and serves as the basis for students' achievement test development.

<u>Method</u>

The state-developed task lists were initially verified by mail surveys to incumbent workers in the specific occupations. The final verification for each task list is done by the technical committee.

Note: Information was not available designating the number of representatives involved in the development/verification processes. The above numbers represent the basic technical committees for the specific job areas.

Oklahoma, Continued

Oklahoma's reasons, methods and sources for developing task lists are so divergent, the following table was created to handle the information. The task lists become an integral part of curriculum. They are used to create and define objectives, performance standards, instructional activities and student competencies. They are also used as an outline for writing materials and to modify or update curriculum content. The state's basic method is for existing task lists to be compiled, then verified. Occasionally the task list was developed, then verified.

Oregon, Continued

Reason

Accounting, Graphics, Office Systems, Marketing and Manufacturing Machining were selected due to a need for updated materials. Electronics was a priority area and Hospitality/Tourism/Recreation, a new area of high priority.

Implementation

The task lists for Accounting, Hospitality/Tourism/Recreation, Graphics, Office Systems and Manufacturing Machining form the basis for program standards, approval and recommended curriculum. The Marketing task lists form the basis for program cluster and guidelines. The Electronics task list, which is updated every six months, becomes the V-TECS product.

Method

Verification of existing task lists from V-TECS and MODAS for the areas of Hospitality/Tourism, Graphics and Marketing is accomplished with the Structured Group Interview (SGI) technique. Verification of the V-TECS Accounting, Office Systems and Electronics and the Illinois Manufacturing Machining task lists is also accomplished with SGI. Oregon used the DACUM method to develop the Recreation task list.

Reason

Each of the nine programs was selected for duty/task list verification because of the high student enrollment and the availability of existing duty/task lists.

<u>Implementation</u>

For instructor use in improving and updating curriculum. The instructors share the task list with their occupational advisory committee to review and make recommendations for additions and deletions, as necessary, to meet the needs of local employers.

<u>Methor</u>

V-TECS and ODAS task lists were compiled to form a basic list, which was reviewed by the technical committee. The list was verified using the mail survey and incumbent worker panel.

Reason

In accordance with the area of priority and the courses that were being developed in Puerto Rico.

Implementation

The task list is included in each curriculum materials produced related to the occupation.

Method

The lists were developed by combining other states' lists and interviews of workers and teachers. The list was then verified using the Structured Group Interview process, an incumbent worker panel and individual interviews.

^{*} The technical committee prepared an Employability Skills List based on other state-developed task lists. The Illinois task list was basis for the analysis Personnel representing the Chamber of Commerce, Teachers, Department of Economic Development and Consultants participated in the development process. Representatives of different governmental offices and all the assistant secretaries of the Department of Education were involved in the verification process.

^{*} Teacher educators

Reason

A task (competency) list was developed for each approved vocational occupational and non-occupational course/program.

Implementation
The task (competency) lists provide the basis for competency based curriculum development, updating and evaluation, criterion-referenced test item development and administration, competency profile development, and development of articulation agreements with local comparable postsecondary education programs.

South Carolina, Continued

Method

In selecting the task lists to verify, results from a mail survey to vocational teachers and administrators, a panel of local and state level technical advisory committees, and information from V-TECS and other research-based materials provided information. Verification of the task lists was accomplished with a mail survey and input from vocational teachers and administrators, educators and local and state advisory committes.

Organization

Technical committee members provide guidance and input, review the annual and three year curriculum priorities, and participate in the field review of all curriculum products.

| Task Listing Title | Stage of Development | | | Product Components | | | | | | | | |
|--|----------------------|------------|---------------------|--------------------|-------|-----------------|----------------|---------------|----------------|-----------------|-------|-------|

| | Workers | Supervisors | Educators | St. Staff | Organiza- tions | COVE | Other | | | | |
| Ayriculture/Agribusiness/Natural Resources | 6 | 2 | 4 | 2 | | | × | | | | |

Reason
The occupational area was chosen based on a decision by members of the state technical committee.

146

Implementation
By updating course to make sure competencies/tasks are included in curriculum.

Method

The DACUM method will be used to develop the task list, which will then be verified by shadowing the worker and with input from a worker panel.

| Task Listing Title | Stage o | of Develo | pment | | | F | roduc | t Comp | onent | S | | |

Reason Each of the occupational areas was selected as a priority area by the State Board of Education.

Implementation
The State Board of Education has approved the lists as required essential elements for the vocational courses.

<u>Method</u>
The state-developed task lists were verified based on the expertise of the committee members.

^{***} Managerial duties

Vermont, Continued

Reason

The occupation/job areas were selected because existing programs are offered at one or more of the 16 area vocational centers throughout the state.

Implementation

The technical committee product is considered core tasks. The tasks are adopted by the Vermont State Board of Education for implementation by a specific date.

Method

An Instructor's Committee develops a task list using existing lists from Vermont, IDECC, NNCCVTE/NECCC, AND AAVIM, and a modified DACUM technique. The technical committee then verifies the task list by using an incumbent panel and/or local program advisory committee. The State Board of Education gives final approval by adopting the task list as a core.

| Law Enforcement | | V 6 | | | | | 1 | | | | | |
| Plumbing | | | | | | | V 6 Entrepreneurs | | | | | |
| Television Production | | V 7 | | | | | | | | | | |

Reason

Agriculture Business -- revision of existing, dated materials.

Carpentry, Catering, Law Enforcement, Plumbing -- program service area priority.

Electronics -- identified as a priority due to state participation in the National Preservice Electronics Training Project sponsored by the U.S. Army.

Television Production -- a program service area priority and lack of curriculum materials.

Implementation

Agriculture Business -- the task analyses is distributed statewide.

Carpentry -- performance objectives are being developed by carpentry teachers and VVCRC writers.

Catering -- a task analyses guide is scheduled for 1988-89.

Electronics -- task analysis is being field-tested by 40 Virginia electronics instructors.

Law Enforcement -- the task analyses guide for an exploratory course in law enforcement his been developed.

Plumbing -- performance objectives are to be developed by the technical consultant and VVCRC writer.

Television Production -- the task list is developed into a task analyses and distributed to teachers statewide.

Method

Agriculture Business, Electronics -- compiled existing state-developed and V-TECS task lists into one task list which was verified by the SGI method. In addition to the workers and supervisors serving on the panel, an educator was the consultant and three state staff were recorders and facilitators.

The Ag Business end product is a task analysis including performance objectives. The Electronics task list will include the task analyses, available when the two-year project is completed.

Carpentry, Catering, Plumbing -- an existing V-TECS task list for each job area was verified by the SGI method.

Law Enforcement -- the state-developed task list adapted from the Virginia Department of Criminal Justice Services model law enforcement curriculum was verified using the SGI method.

Television Production -- the existing task list that was verified by use of the SGI method was a combination of a state-developed, V-TECS and Virginia DACUM task list.

Dear Vocational Education Director:

The National Network for Curriculum Coordination in Vocational and Technical Education (NNCCVTE) continues its effort to better serve you. In order to do this and to keep abreast of the state technical committee activities in your state, the East Central Curriculum Coordination Center of the NNCCVTE is working with the Illinois Vocational Curriculum Center to conduct this technical committee/task list survey. We need your cooperation in this project.

In the Fall of 1986, your state participated in a State Technical Committee survey conducted by the East Central Curriculum Coordination Center and the National State of Business (NAB). A copy of the Executive Summary from that report is attached for your information. Since the 1986 survey a lot has happened as a result of the Carl D. Perkins Act's mandate for state technical committees.

The purpose of this survey is to identify the results of the state technical committee work. Please take the few minutes needed to complete this instrument. The survey requests information on all technical committee activities from the time your state started to implement the legislative mandate. The dates requested in item 3 are of utmost importance; please do not neglect to include the dates.

The data gleaned from the survey will be analyzed and compiled in a report. Each State Liaison Representative will receive a copy of the report. The East Central Curriculum Coordination Center plans to disseminate the report to the National Council of Vocational Education, Federal offices, legislators and other appropriate officials/agencies. The report is one way of documenting that the vocational education legislative mandate is being implemented throughout the nation.

Thank you for giving this survey your attention. Your dedication and interest in vocational education are greatly appreciated by us.

Sincerely, ECN/IVCC Staff

Technical Committee/Task List Survey

INSTRUCTIONS:

Please supply the appropriate information on the survey for each task list or inventory of skills. A separate form needs to be completed for each task. If additional copies of the form are required, duplicate the necessary number.

When possible, submit a copy of the completed task list with each completed form.

Return the completed form(s) and task list(s) by April 1, 1988 to Dr. Ruth Patton, ECN/IVCC, F-2, Sangamon State University, Springfield, IL 62794-9243. If you have questions, please call her at 217/786-6163.

RE:

State Technical Committee Survey

Did you receive the May 1988 edition of <u>Vocational Education Journal?</u> The issue focuses on the State Technical Committees and has generated a great deal of interest as evidenced by the comments we have received.

The East Central Curriculum Coordination Center/NNCCVTE in conjunction with the Illinois Vocational Curriculum Center is involved with a follow-up report to the 1986 study and is also building a clearinghouse of technical committee task lists. You should have received a survey form in March requesting information on your state's Technical Committee activity. Since I have not yet received a response from you, I am enclosing another survey form.

I know it is time consuming, but please complete the enclosed form and return to me as soon as possible. The report must be completed by the end of November and without your help, it will not be complete.

INSTRUCTIONS FOR TECHNICAL COMMITTEE/TASK LIST SURVEY

Please supply the appropriate information on the survey for each task list or inventory of skills. A separate form needs to be completed for each task list. If additional copies of the form are required, duplicate the necessary number.

When possible, submit a copy of the completed task list with each form.

Return the form(s) and tasks lists(s) as soon as possible to Dr. Ruth Patton, ECN/IVCC, F-2 Sangamon State University, Springfield, IL 627094-9243. If you have questions, please call her at 217/786-6163.
